Product code: 56983

The Bluetooth 6.0 wireless audio transmitter enables wireless audio transmission to classic audio systems. It provides stable stereo signal transmission and clear sound without any loss of quality. With 2 RCA and AUX (3.5 mm) outputs, the adapter allows you to easily connect your smartphone, tablet or laptop to a Hi-Fi system, amplifier, receiver or car audio system.

- Support for popular Bluetooth protocols (SBC, AAC, A2DP, AVRCP, HFP) guarantees high sound quality and full functionality when playing music and making calls.
- Transmission range up to 10 metres.

MODERN BLUETOOTH AUDIO TRANSMITTER – WIRELESS SOUND TRANSMISSION

Bluetooth 6.0 – stable and modern wireless connectivity

A compact Bluetooth audio transmitter is an easy way to upgrade classic audio equipment wirelessly. It allows you to stream audio from your phone, tablet or laptop directly to devices equipped with AUX or RCA inputs. The Bluetooth 6.0 technology ensures a stable connection, low latency and high sound quality, both when listening to music and making calls. The device is powered directly via the USB port. Simply connect it to the USB port on your radio, computer or mains charger to enjoy uninterrupted operation and everyday convenience.

INSTANT CONNECTION, FULL SOUND CONTROL

Quick pairing and complete freedom of use

Pairing devices is quick and intuitive — simply bring a compatible smartphone close to automatically establish a Bluetooth connection . Support for popular audio profiles ensures clear stereo sound and convenient playback control, while a transmission range of up to 10 metres allows for comfortable use at home, in the office or in the car, without the need for cables. Powered by an external USB power supply – can operate continuously without draining your phone's battery, ideal for home and stationary use (e.g. Hi-Fi system, receiver, active speakers).
