

Power cable

Model: **AK-OT-02S**

Product code	AK-OT-02S
Product type	Power cable
Responsible Entity	Akyga Europe Sp. z o.o., 52-200 Suchy Dwór, Wrocławska 1c, Polska/Poland, contact@akyga.com
Ground wire	Yes
Cable length	1.8 m
The cable plug #1	Hybrid standard C/E/F (CEE 7/7)
The cable plug #2	Without termination
Cable material	Copper
Wire gauge	3x 1.5 mm ²
Standard	H05RR-F 3G1.5
Product color	Black
Product size (L x W x H)	270 x 55 x 55 mm
Net weight	270 g
CE compatibility	Yes
FCC compatibility	No
RoHS compatibility	Yes
REACH compatibility	Yes
EAN code	5906708751143
Warranty	24 months

Description

CEE 7/7 repair cable for electrical appliances

Akyga® AK-OT-02S is a CEE 7/7 power cable designed for repairing or replacing a damaged cable in electrical appliances. One end of the cable is fitted with a ready-to-use CEE 7/7 plug, whilst the other end features bare wires for direct connection to the appliance.

This solution is ideal when the original cable has been cut, frayed or damaged, and there is no need to replace the entire appliance. The cable can be used, amongst other things, in domestic appliances, audio-visual equipment, power tools and other devices powered by a 230 V mains supply.

3 × 1.5 mm² copper conductors

The power cable is made up of **three copper conductors with a cross-sectional area of 1.5 mm²**. These correspond to the live, neutral and earth conductors. Copper ensures effective current conduction, whilst the appropriate conductor thickness allows the cable to be used even in appliances with higher power requirements.

The cable has **rubber insulation**, which increases its flexibility and makes it easier to route during installation. Thanks to its robust construction, the cable is well-suited to everyday use, including bending and movement.

CEE 7/7 Schuko plug

The **CEE 7/7 plug** used is a standard popular in Europe that combines Type E and Type F solutions. As a result, the CEE 7/7 power cable is compatible with typical sockets used in countries such as Poland, Germany and France.

The hybrid CEE 7/7 design enables correct earthing in both type E sockets and type F Schuko sockets. This is particularly important for appliances that require a protective conductor.

For repairing and replacing power cables

The Akyga® AK-OT-02S cable is a practical solution for service technicians, electricians and those involved in repairing electrical equipment. The CEE 7/7 power cable can be used to restore power to a device.

Before installation, check the device's electrical specifications and ensure that the cable is suitable for the intended application. For safety reasons, installation should be carried out by an electrician or a suitably qualified person.

Length 1.8 m - convenience in use

The **1.8 m cable length** provides sufficient freedom when plugging the equipment into a socket, whilst not leaving a large amount of excess cable behind the appliance.
