

BETA 7644GG

Stretch sweatshirt, long-sleeved, with graphene

Features

The Beta line in graphene combines temperature-regulating properties with a modern design for clothing that makes you feel and look your best.

GRAPHENE TECHNOLOGY

Graphene in fabrics optimises thermal comfort: it absorbs excess heat and releases it when it gets cold, maintaining an ideal temperature. It is light, durable, and improves garment comfort.

MODERN DESIGN

The Beta sweatshirt in graphene is studied in detail: modern design and tailor-made customisation converge to offer comfort and distinctive style in every working situation.

SMART TECHNOLOGY

Graphene is an intelligent material that efficiently absorbs, retains and dissipates heat, ensuring optimal thermal comfort.

FEATURES

The presence of pockets, both inside and outside, means that necessary items are always at hand.

Size

IT 46 - 58
UK XS - 3XL

Composition

- 60% cotton, 40% polyester with graphene, 280 g/m2

Design

- Large waist pockets
- Two interior pockets
- Closure with zip and protective garage
- Reflective inserts
