

Power cable

Model: **AK-UP-01S**

Product code	AK-UP-01S
Product type	Power cable
Responsible Entity	Akyga Europe Sp. z o.o., 52-200 Suchy Dwór, Wrocławska 1c, Polska/Poland, contact@akyga.com
Output voltage	250 V
Output amperage	16 A
Ground wire	Yes
Cable length	1.8 m
The cable plug #1	Hybrid standard C/E/F (CEE 7/7)
The cable plug #2	IEC C19
Cable material	Copper
Wire gauge	3x 1.5 mm ²
Product color	Black
Product size (L x W x H)	280 x 60 x 50 mm
Net weight	295 g
CE compatibility	Yes
FCC compatibility	No
RoHS compatibility	Yes
REACH compatibility	Yes
EAN code	5906708751204
Warranty	24 months

Description

Server Power Cable for Demanding Equipment

The **Akyga® AK-UP-01S** is a **server power cable** designed for IT equipment that requires a reliable connection to the electrical grid. The cable connects a **CEE 7/7 Schuko plug** to an **IEC C19 connector**, making it ideal for use with servers, UPS power supplies, PDUs, and other devices equipped with an IEC C20 socket.

3 × 1.5 mm² copper conductors - stable power supply

The cable is constructed from **three copper conductors with a cross-sectional area of 1.5 mm²**, which are well-suited for powering devices with higher power consumption. The larger cross-sectional area of the conductors helps minimize cable heating during operation under load. This solution is designed for everyday use in environments where power stability and safety are critical.

IEC C19 Connector for Professional Applications

The **IEC C19 connector** is compatible with IEC C20 sockets, which are primarily found in more demanding IT equipment and professional power systems.

The cable is ideal for use with, among other things:

- servers,
- UPS power supplies,
- PDUs and rack cabinets,
- network devices,
- and select industrial equipment.

1.8 m length for convenient workstation organization

The **1.8-meter cable** ensures convenience when connecting equipment while also helping to keep your rack cabinet or workstation tidy. The CEE 7/7 plug fits popular Type E and F outlets used in Poland and many other European countries. With its copper conductors, durable PVC insulation, and versatile length, the Akyga® AK-UP-01S is well-suited for everyday use at home, in the office, and in professional IT infrastructure.
