

Wi-Fi Power Relay Controller

Description

Wi-Fi Power Relay Controller is an intelligent switch, allowing to control a device and measure its power usage. You can control it using [WiseWave](#) app as well as via input marked with **I**, which controls **0** output.

Schematics

Technical Specification

Description		Value
Input voltage		110 - 230 VAC
Power consumption		<1W
Number of outputs		1
Type of output		Relay
Max. output current		16 A
Output voltage		Same as input voltage (110 - 230 VAC)
Number of inputs		1
Type of input		Bistable (ON/OFF) / Monostable (like doorbell)
Control signal		L or N
Wi-Fi		802.11 b/g/n (2.4 GHz)
Installation method		flush-mounted box
Length		41.8 mm
Width		41.8 mm
Height		25.5 mm
