EAN code	5901720136879

Description

Akyga® AK-SC-E02 is a Type 1 (J1772) plug for electric vehicles. It can confidently replace a worn out connector, as well as be used to assemble your own electric car charging cable. The high-quality gold-plated contacts provide a perfect connection to the charging socket and allow you to **charge your vehicle with up to 32 A**. What's more, the plug has **a rubber cap** that makes it easy to keep the contacts clean during transport, thus protecting them from accidental damage. At the top of the plug there is **a button with a padlock eyelet**, which is used to protect the connector from being unplugged during charging.
